Solution 7.5

The medical fringe benefit of R21 000 should also be allowed as a deduction, as Mickey Mouse was taxed on it and he is 66 years old.

The taxable income will become R218 534 (R239 534 – R21 000).

Normal tax on taxable income, excluding lump sums, becomes:

(R218 534 – R165 600) x 25% + R29 808 = R43 042.

There is no medical scheme fees tax credit, as Mickey is 66 years old. The rest of the calculations must be adjusted accordingly.
