- 2.2 While reading jot down the key words and page references of each outcome on that page
- 2.3 Study the learning outcomes by reading through the study guide and appropriate sections of the prescribed books and making notes on your page.

Do as many exam papers as time (and your schedule) will permit. Each one will become easier for you.

Please students let us start now in preparation for the exam and keep to the revision plan. We must achieve all that we are to achieve every week. As we study individually, we need to share ideas to ensure that we are on the right track. We can ask our questions, concerns, challenges, contributions, etc in the already created forums/topics for each unit, assignments and past question papers on our group site. Example: this week we are to deal with Assignment 1 and Unit 2, so your comments, challenges, etc this week should be posted on forum with unit 1 and Assignment one. Talking on the group site will help me to give all the assistance that I can offer to ensure that you understand and pass this module.

Best wishes in your studies and in your coming examination!
