

## TRL308C

May/June 2010

## **LOGISTICS SYSTEMS (TRANSPORT ECONOMICS 308)**

Duration

2 Hours

70 Marks

**EXAMINERS** •

FIRST SECOND · MR JL THERON

MR JW BARENDRECHT

EXTERNAL

PROF JH DU PLESSIS

### This paper consists of 173 pages

This examination paper remains the property of the University of South Africa and may not be removed from the examination room.

### **INSTRUCTIONS:**

THIS IS A <u>FILL IN</u> EXAMINATION - WRITE YOUR ANSWERS IN THIS BOOKLET AND HAND IT IN TO THE INVIGILATOR WHEN YOU ARE DONE.

### THIS EXAMINATION PAPER CONSISTS OF:

SECTION A: COMPULSORY MULTIPLE CHOICE QUESTIONS

(20 MARKS)

SECTION B: COMPLETE ANY TWO (2) OF THE THREE (3) LONG QUESTIONS

(50 MARKS)

**TOTAL OF 70 MARKS** 

# SECTION A

# ANSWER <u>ALL</u> THE QUESTIONS IN THIS SECTION TOTAL OF 20 MARKS

#### **SECTION A:**

- 1.1 The process of planning, implementing and controlling the efficient, cost effective flow and storage of materials, in process inventory, finished goods and related information from the point of origin through the point of consumption and finally to the point of disposition for the purpose of conforming to customer requirements is the definition of logistics
  - [A] from an inventory perspective
  - [B] from a societal perspective
  - [C] offered by the Society of Logistics Engineering and Logisticians (SLEL)
  - [D] provided by the Council of Logistics Management (CLM)
- 1.2 What is true about the customer order cycle?
  - [A] order preparation and transmittal initiates the process
  - [B] order processing follows warehouse picking
  - [C] warehouse picking preceded order transportation
  - [D] only A and C are correct
- 1.3 Which one of the following is characterized by formalized rules, procedures, standardized communications and a large volume of orders?
  - [A] strategic planning
  - [B] decision analysis
  - [C] management control
  - [D] transaction system
- 1.4 Which one of the following focuses on performance dimensions which include cost, customer service, productivity, quality and asset management?
  - [A] strategic management
  - [B] division analysis
  - [C] management control
  - [D] transactional system

1.5	mana	evel of information functionality that compares different supply chain designs, inventory gement systems, resource allocation tools, transportation routing systems and segmental ability is known as?
	[A] [B] [C] [D]	strategic planning decision analysis management control transaction system
1.6		evel of information functionality that evaluates the desirability of alliances, development and ment of manufacturing capabilities and opportunities related to customer responsiveness is a s
	[A] [B] [C] [D]	strategic planning division analysis management control transaction system
1.7	syster	is NOT a major system module for the comprehensive supply chain information
	[A] [B] [C] [D]	Enterprise resource planning Communication systems Execution systems Electronic data interchange systems
1.8	perfor	maintains current and historical data and processes to initiate and monitor mance and track critical activities?
	[A] [B] [C] [D]	Enterprise resource planning Communication systems Execution systems Electronic data interchange systems
1.9	Which (SCIS	n one of the following are application-oriented modules for the supply chain information system
	[A] [B] [C] [D]	communication systems execution systems planning systems all the above
1.10		n one of the following is the file of the central database that facilitates packaging, customization itting in distribution centre operations?
	[A] [B] [C] [D]	order file bill of materials file purchase order file inventory file

1.11	Whic	one of the following is a component of information sharing technology?
	[A] [B] [C]	global data synchronization advanced planning and scheduling capacity requirements planning
	[D]	manufacturing resource planning
1.12		n one of the following could be used for identifying a container or its contents as it moves through es or between transport modes?
	[A] [B]	Internet electronic product code
	[C]	Image processing
	[D]	radio frequency exchange
l.13	stand	can be defined as direct computer-to-computer exchange of business documents in ard formats to facilitate high-volume transactions?
	[A]	enterprise resource planning
	[B] [C]	electronic data interchange electronic product code
	[D]	value added networks
l.14		h one of the following is a common interface between sending and receiving systems, where
		action messages and information are collected from the manufacturer and then translated into priate industry-specific communication standards?
	[A]	electronic product code [EPC]
	[B] [C]	value-added networks [VANs] global data synchronization [GDS]
	[D]	radio frequency exchange [RFE]
1.15	Whic	h of the following is NOT an enterprise resource planning [ERP] module?
	[A]	financial and operation reporting module
	[B]	supply chain information module
	[C] [D]	planning and monitoring module integration and administration
.16		incorporate processes to guide physical activities, including product receipt, material
	move	ment and storage and order selection
	[A]	warehouse management system

	[B] [C] [D]	customer relationship management system transport management system yard management system
1.17	Which	one of the following systems explodes the bill of materials of the scheduled products to the ed raw materials and communicates the requirements to the appropriate suppliers?
	[A] [B] [C] [D]	manufacturing resource planning capacity requirement planning master production scheduling manufacturing order scheduling
1.18		one of the following production strategies is a primary determinant in warehouse shment?
	[A] [B] [C] [D]	just in time rapid replenishment assemble to order closed loop
1.19	Which	one of the following is not a phase in formulating the logistical strategy?
	[A] [B] [C] [D]	determining the least total cost network measuring service availability determining materials flow conducting sensitivity analysis
1.20		is the overall level of customer service associated with the least total cost service design
	[A] [B] [C] [D]	maximum service level average service level lowest service level threshold service level
		ROUGH WORK

# SECTION B

ANSWER ANY TWO (2) OF THE THREE (3) QUESTIONS IN THIS SECTION TOTAL OF 50 MARKS

PLEASE NOTE: ONLY THE FIRST TWO (2) QUESTIONS WILL BE MARKED IF YOU ANSWERED ALL THREE (3) QUESTIONS IN THIS SECTION

### **QUESTION 2**

You have recently joined a large company that manufactures and distributes beverages and foods and soon realised that the competitiveness of the company can be improved through proper information systems. Compile a report to the managing director motivating why an Enterprise Resource Planning (ERP) system

should be implemented and what such a system should look like. Clearly explain the modules and files the should be included in the ERP system to initiate and coordinate, business activities.

## **QUESTION 3**

Identify and explain the typical data required to be applied in the planning and design of a logistics network under the following headings

(i) Data requirements for location decisions

### **QUESTION 4**

Just as no ideal logistical system is suitable for all enterprises, the method for identifying and evaluating alternative logistic strategies can vary extensively. However, there are a general process applicable to most logistics design and analysis situations"

(i) Illustrate this logistics system design process with a diagram (5)
